PROFILE

A junior IT professional eager to strengthen practical experience and continuously deepen technical skills. Passionate about building reliable and creative digital products, taking on new challenges, and gaining hands-on experience through real-world projects.

WORK EXPERIENCES

TF Systems Sdn Bhd

November 2024 - June 2026

Junior Software Engineer

- Developed and maintained responsive websites and web applications.
- Designed and refined wireframes for web and mobile application interfaces using Adobe XD based on project requirements and user needs.
- Developed and maintained automated end-to-end and functional test scripts using Playwright to improve testing efficiency and application reliability.
- Collaborated with the team to investigate, reproduce, and verify bug fixes, ensuring application quality before deployment.
- Performed regression testing to ensure new features did not impact existing functionality.
- Reported testing progress, documented defects, and tracked issue resolution.

IPG Mediabrands

June 2024 - October 2024

Web Developer Intern

- Developed digital advertisement banners using vanilla HTML and Google Ads Studio.
- Assisted in developing and maintaining responsive websites.
- Performed manual testing of responsive websites to identify and report functional and UI issues.
- Collaborated with cross-functional team members to implement project requirements and ensure timely project delivery.

EDUCATION

BSc(Hons) in Multimedia Computing

2021-2024

YPC International College in Collaboration with
Liverpool John Moores University
CGPA 3.94
